METHOD AND SYSTEM FOR PROVIDING ACCESS TO A TELECOMMUNICATIONS NETWORK

ABSTRACT OF THE DISCLOSURE

ACCESS TO A TELECOMMUNICATIONS NETWORK

ABSTRACT OF THE DISCLOSURE

A system and a method for connecting a call through a telecommunications network. A base station, connected to a public switched telephone network, includes a call processor, a memory and a transceiver. The memory includes a database containing dialing instructions for a wireless station for a telephone connection through the public switched telephone network to a destination station. The transceiver receives a call request from the wireless station, and the call processor in response to the call request, accesses the database and dials a call for connection through the public switched telephone network to the destination station based on the dialing instructions for the wireless station.
